English – Proficient

SUMMARY

I'm a passionate Front-End developer with a strong commitment to crafting exceptional user experiences on the web. With a background rooted in both creativity and technology, I bridge the gap between design and functionality, transforming concepts into visually appealing and interactive digital solutions.

SKILLS

HTML	BootStrap	Svelte.js	React Query	Git
CSS	TailwindCSS	React Native	Zustand	GitHub
JavaScript	React.js	Expo	Vite	Problem Solving
TypeScript	Next.js	Redux	Webpack	

EXPERIENCE

Front-End Engineer, iSoft Land Inc, California, USA

Jul 2025 – Oct 2025

Projects: ARProClean, H.M.S Zipper.

ARProClean – Web Application Development.

- Built a fully responsive web platform for booking professional cleaning services.
- Integrated Stripe payments, reCAPTCHA and form validation (React Hook Form + Yup).
- Developed a user profile page with order history, cancellation, and automated refunds.
- Developed a full admin dashboard with CRUD, analytics, order/refund handling, advanced search, filtering, and employee scheduling via FullCalendar.

H.M.S Zipper – Web Application Development.

- Built a specialized **e-commerce platform for zippers** with dynamic search and filters.
- Added "**Order via WhatsApp/Telegram**" for quick checkout.
- Developed a full-featured **admin dashboard** with CRUD for products, sizes, and categories.

Front-End Developer, Freelance

Nov 2024 – present

Projects: Marsad

- Built a responsive Arabic text analysis app with advanced linguistic metrics.
- Integrated Google Charts for visual data and export options (SVG/PNG/XLSX).

Junior Front-End Developer, Tad Center, Homs, Syria

Jun 2024 – Oct 2024

Projects: *Swiftap.*

- Integrated Stripe for secure payment processing.
- Implemented data visualization using Chart.js.

Internship Front-End Developer, Akwad, Homs, Syria

Nov 2023 – Mar 2024

- Converted UI designs into responsive pages using HTML, CSS, JavaScript, and Bootstrap.
- Built React apps with Redux and Styled Components.
- Developed an authentication-based website and a themed chat application.

SELF PROJECTS

1 – Motion Graphics Portfolio

Technologies: HTML, CSS, JavaScript

- Built a responsive personal portfolio with animations and interactive elements to showcase motion graphics.

2 – IMDb Clone

Technologies: Next.js, TailwindCSS

- Built full-featured movie database application using Next.js with external API integration.
- Implemented dynamic routing, server-side rendering, and responsive UI with search functionality.

3 - Foodies app

Technologies: Next.js

- Developed a movie database app using an external API with dynamic routing, SSR, and responsive design.
