SUMMARY

I'm a passionate Front-End developer with a strong commitment to crafting exceptional user experiences on the web. With a background rooted in both creativity and technology, I bridge the gap between design and functionality, transforming concepts into visually appealing and interactive digital solutions.

SKILLS

HTML CSS JavaScript TypeScript BootStrap	TailwindCss React.js Next.js Svelte.js React Native	Redux React Query Zustand Version Control Problem Solving
--	---	---

EXPERIENCE

Front-End Engineer, iSoft Land Inc, California, USA Jul 2025 – present

Projects: *ARProClean.*

ARProClean – Web Application Development.

- Built a fully responsive web platform for booking professional cleaning services.
- Integrated Stripe for secure payments and reCAPTCHA for spam protection.
- Implemented form handling with React Hook Form and validation with Yup.
- Developed a user profile page with order history, cancellation, and automated refunds.
- Created an admin dashboard with:
 - CRUD for employees, customers, services, add-on services, service details, and scheduling options.
 - Order management with cancellation and refund handling.
 - Analytics (customers, orders, and profits – monthly & yearly).
 - Advanced search, filtering, and employee scheduling using FullCalendar.
 - Dashboard user management (CRUD for admin/staff accounts).

Junior Front-End Developer, Tad Center, Homs, Syria Jun 2024 – Oct 2024

Projects: *Swiftap.*

- Integrated Stripe for secure payment processing.
- Implemented data visualization using Chart.js.

Front-End Developer, Freelance Nov 2024 – present

Projects: Marsad

- Developed a responsive web application for Arabic text analysis with advanced linguistic processing.
- Integrated Google Charts API for interactive visualizations of language metrics.
- Added export features for charts (SVG/PNG) and analytical data (XLSX).

Internship Front-End Developer, Akwad, Homs, Syria

Nov 2023 – Mar 2024

- Converted multiple UI designs into responsive web pages using HTML, CSS, JavaScript, and Bootstrap.
- Built UIs with React and Redux, gaining practical experience in state management and component architecture.
- Developed a website with authentication (user registration, login, and secure access).
- Created a themed chat application using React and Styled Components.
- Applied best practices for clean, modular, and maintainable code.

SELF PROJECTS

1 – Motion Graphics Portfolio

Technologies: HTML, CSS, JavaScript

- Developed responsive portfolio website with smooth animations and interactive elements.
- Created professional showcase featuring motion graphics.

2 – IMDb Clone

Technologies: Next.js, TailwindCss

- Built full-featured movie database application using Next.js with external API integration.
- Implemented dynamic routing, server-side rendering, and responsive UI with search functionality.

3 - Foodies app

Technologies: Next.js

- Built a modern food community platform with Next.js.
- Designed a responsive UI for seamless multi-device browsing.
- Implemented recipe uploads, likes, and comments for user engagement.
- Optimized performance using Next.js server-side rendering.
